

I'm sticking with my union!

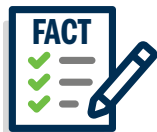

Educators in Florida have the constitutional right to join in union and ***advocate for themselves and their students.***

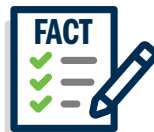

Unions provide educators a voice in all aspects of their job, including curriculum and professional development as well as pay, healthcare, and retirement.

Gov. DeSantis is trying to limit your constitutional right to be a union member. **By signing up for eDues, you can protect your right to be a union member.**

Without a union contract, there is nothing to guarantee you a planning period or duty free lunch. **Without a contract, do you trust your school board to take care of you?**

Our unions are the only thing standing in the way of politicians who want to privatize education and turn their back on the promise to provide a free, high-quality education to every child in Florida.
