# Foreword

In last year’s Foreword, we noted that it was “a perilous time for education data.” One year later, this continues to be the case. While the National Center for Education Statistics (NCES) has released some data products, and its budget remains largely intact, its staffing remains minimal, and it is unclear what actions will be taken in response to a report commissioned by the U.S. Secretary of Education about how to reimagine NCES’ parent agency, the Institute of Education Sciences (IES).

It is in this environment of uncertainty and precariousness that we release *Rankings of the States 2025* and *Estimates of School Statistics 2026*, NEA’s annual compilation of key statistics about the nation’s public schools as gathered from state departments of education. NEA offers this report to its state and local affiliates as well as to researchers, policymakers, and the public as a tool to examine public education programs and services. The data presented provide facts about the extent to which local, state, and federal governments commit resources to public education. As one might expect in a nation as diverse as the United States—with respect to economics, geography, and politics—the level of commitment to education varies greatly on a state-by-state basis.

Part I of this report—*Rankings 2025*—provides state-level data on an array of topics relevant to the complex enterprise of public education. Since the 1960s, Rankings has presented facts and figures useful in determining how states differ from one another—and from national averages—on important school statistics such as student attendance, teacher employment and average salary, and school revenues and expenditures. Of course, no set of tables tells the entire story of a state’s education offerings; therefore, it is unwise to draw conclusions based solely on individual statistics in this report.

Part II of this report—*Estimates 2026*—provides data tables projecting public school enrollment, employment and salaries of personnel, and finances, as reported by state departments of education or projected by NEA using standard statistical techniques. The influx of federal funding through COVID relief measures added a new layer of complexity to the development of financial projections. COVID relief funding was included in revenue and expenditure data by states if such data was available at the time of survey data collection. For states that did not provide data, the effect of COVID relief funds on revenues and expenditures was estimated based on data from the U.S. Department of Education.

Part III of this report—*National Trends 2017–26*—presents summary data of national trends in student enrollment and attendance, staff salaries, sources of school funding, and levels of educational expenditures in the previous 10 years. Such trends at the national level have been based on data reported state by state.

Public education in the United States is a joint enterprise between local, state, and federal governments. The federal government’s role, while smaller than the other two financially, is key to ensuring that all students have access to high-quality public schools. The education data and research infrastructure set up and maintained by the federal government facilitates understanding whether, where, and why our nation is falling short on that goal. We are hopeful that in next year’s Foreword, we will be able to celebrate the full revival of this infrastructure.

NEA Research  
April 2026

# Executive Summary

NEA Research collects, maintains, and analyzes data on issues and trends affecting the nation's public education systems, their employees, and students. This report, *Rankings of the States 2025 and Estimates of School Statistics 2026*, contains data primarily based on information from state departments of education. Significant highlights of the report are below.

## Part I. Rankings 2025 Highlights

### Enrollment and Attendance

In fall 2024, U.S. public schools enrolled 48,836,735 students, a decrease of 0.3 percent from fall 2023.

The largest increases occurred in the District of Columbia (1.5%), Arkansas (0.8%), and Minnesota (0.8%). The greatest declines were in Montana (-2.7%), New York (-1.8%), and West Virginia (-1.6%).

The number of students in average daily attendance (ADA) increased by 0.1 percent nationwide, from 44,881,434 in 2023-24 to 44,924,490 in 2024-25.

### Classroom Teachers

U.S. public schools employed 3,231,992 teachers in 2024-25. Texas (369,791), California (270,067), and New York (218,424) employed the most teachers, while Alaska (6,680), Wyoming (7,311), and Vermont (7,882) employed the fewest.

The average number of students enrolled per teacher remained at 15.1 from 2023-24 to 2024-25.

States with the highest number of students enrolled per teacher in fall 2024 were Arizona (22.3), Nevada (22.2), and Utah (21.9). States with the lowest student-teacher ratios in fall 2024 were Vermont (10.3), New York (10.8), and District of Columbia (10.9).

### Teacher Salary

The national average public school teacher salary for 2024-25 was \$74,495. State average teacher salaries ranged from those in California (\$103,552), New York (\$98,655), and Washington (\$96,589) at the high end to Mississippi (\$54,975), Florida (\$56,663), and Louisiana (\$56,785) at the low end.

The national average one-year change in public school teacher salaries from 2023-24 to 2024-25 was 3.5 percent. The largest one-year increases were in Nevada (11.8%), District of Columbia (9.7%), and Delaware (7.6%).

### School Revenue

The federal share of school revenue declined to 7.8 percent of total revenue receipts in 2024-25, due to the winding down of federal COVID relief funds. Correspondingly, shares of state and local funding in 2024-25 increased by several percentage points to 47.1 percent and 45.1 percent, respectively.

## **Expenditures per Student**

The national average per-student expenditure in 2024-25 based on fall enrollment was \$17,840, a gain of 3.4 percent from \$17,250 in 2023-24. The following had the highest per-student expenditures: New York (\$32,370), the District of Columbia (\$30,564), and Vermont (\$29,534). Idaho (\$11,578), Tennessee (\$11,723), and Arizona (\$11,987) had the lowest per-student expenditures.

# **Part II. Estimates 2026 Highlights**

## **Enrollment**

Public school enrollment is expected to decrease by an estimated 1.0 percent from 2024-25 (48,836,735) to 2025-26 (48,370,054).

## **Average Daily Attendance**

The number of students in average daily attendance is projected to decrease slightly by 0.9 percent from 44,924,490 in 2024-25 to 44,530,211 in 2025-26.

## **Instructional Staff**

The total number of instructional staff is expected to increase by 0.3 percent from 3,852,634 in 2024-25 to 3,863,325 in 2025-26.

## **Classroom Teachers**

The number of public school classroom teachers is expected to increase slightly by 0.03 percent from 2024-25 (3,231,992) to 2025-26 (3,232,905).

## **Instructional Staff and Classroom Teacher Salaries**

The average salary of instructional staff is projected to increase to \$78,702 in 2025-26, a gain of 2.7 percent from 2024-25 (\$76,621).

The average classroom teacher salary for 2025-26 is projected to increase by 2.8 percent over 2024-25, from \$74,495 to \$76,552.

## **School Revenue**

State governments are expected to provide 47.8 percent of public school financial support for 2025-26, up 0.7 percentage points from 2024-25. For 2025-26, the federal government's contribution to public elementary and secondary school revenues is estimated to be 7.3 percent, versus 7.8 percent in 2024-25. In 2025-26, the contribution from local government is an estimated 44.9 percent, a slight decrease from 45.1 percent the previous year.

## **Student Expenditures**

Current expenditures per student in fall enrollment are projected to increase by 5.8 percent to \$18,870 in 2025-26, up from \$17,840 in 2024-25. This rate compares with a 4.8 percent increase in total current expenditures.

## **Part III. National Trends 2017-26 Highlights**

### **School Districts**

The number of school districts decreased from 2016-17 (16,611) to 2025-26 (16,026). Of these 16,026 school districts, 15,813 (98.7%) are operating school districts.

### **Fall Enrollment**

Public school enrollment decreased by an estimated 3.6 percent from fall 2016 (50,182,742) to fall 2025 (48,370,054).

### **Average Daily Attendance**

The total number of students measured by average daily attendance decreased by an estimated 5.2 percent over the past decade, from 46,972,541 in 2016-17 to 44,530,211 in 2025-26.

### **Instructional Staff**

Public schools employed an estimated 3,863,325 instructional staff in 2025-26, reflecting a 4.3 percent increase compared to 3,703,481 in 2016-17.

### **Classroom Teachers**

The number of K-12 classroom teachers is estimated to be 3,232,905 in 2025-26, an increase of 1.9 percent compared to 3,172,741 in 2016-17.

### **Instructional Staff and Classroom Teacher Salaries**

The national average instructional staff salary for 2025-26 is estimated at \$78,702, representing a gain of 27.5 percent since 2016-17 (\$61,711).

The average classroom teacher salary is estimated at \$76,552 for the 2025-26 school year, an increase of 28.2 percent over \$59,722 in 2016-17.

### **Inflation-adjusted Salaries**

There are significant differences between the average salaries in current dollars and constant dollars. The growth in current-dollar salaries for both instructional staff and classroom teachers has been substantial since 2016-17. However, when considering the effects of inflation, the average salary of classroom teachers has actually decreased by an estimated 4.6 percent from 2016-17 to 2025-26. Similarly, the average salary for instructional staff has decreased by an estimated 5.1 percent.

### **Total Receipts**

Total national public school revenue and nonrevenue receipts for 2025-26 are estimated at \$1.1 trillion, an increase of 43.9 percent since 2016-17. When adjusted for inflation, total receipts increased an estimated 7.1 percent over the decade.

## **Revenue Receipts**

From 2016-17 to 2025-26, public school revenue receipts rose by an estimated 47.7 percent. Adjusting for inflation, these revenues increased 9.9 percent over the decade.

During this 10-year period, the share of state funding ranged between 44.4 and 47.8 percent of total revenue receipts. State education resources increased by an estimated 50.2 percent from school year 2017 to 2026, but increased 11.8 percent when adjusted for inflation. Local governments contributed slightly less to school revenue receipts as the state governments, with shares ranging from 42.0 percent to 45.4 percent.

From 2016-17 to 2025-26, the federal share is projected to decrease slightly from 8.0 to 7.3 percent. Federal resources increased by an estimated 35.7 percent in current dollars and 0.9 percent when adjusted for inflation.

## **Total Expenditures**

The total amount to be spent for current expenditures, capital outlay, and interest payments increased by an estimated 47.8 percent from 2016-17 to 2025-26. Adjusting for the effects of price inflation, total expenditures increased by an estimated 9.9 percent over the decade.

## **Current Expenditures**

Current expenditures for public schools grew from \$616.5 billion in 2016-17 to an estimated \$912.7 billion in 2025-26, a 48.1 percent increase. Current expenditures grew by 10.2 percent during the 10 years in inflation-adjusted dollars.

## **Current Expenditure Per Student in Enrollment**

Over the last decade, average per-student expenditure rose by an estimated 53.6 percent from \$12,285 to \$18,870. After inflation adjustment, the expenditure per student in enrollment increased by 14.3 percent.

## **Current Expenditure Per Student in Average Daily Attendance**

Average expenditure per student in average daily attendance increased by an estimated 56.2 percent from \$13,124 in 2016-17, to an estimated \$20,497 in 2025-26. The average expenditure increased by 16.2 percent over the decade after being adjusted for inflation.

## Technical Notes

The first part of this publication, *Rankings 2025*, contains ranking statistics of public elementary and secondary schools for the 50 states and the District of Columbia. The education data are the most recent actual or estimated data collected primarily from state departments of education. All tables on schools and students, teachers and instructional staff, school revenues, and education expenditures have been updated from the previous edition.

The second part, *Estimates 2026*, presents public school data for the 50 states and the District of Columbia based on survey responses from state education agencies. State department of education contacts are asked to provide estimated data for the current year (2025-26) and revisions to six years of historical data, as necessary. Therefore, data for school years 2019-20 through 2024-25 were subject to revision as a result of the 2025 surveys. The estimated data featured in this report are for the current school year (2025-26) and the previous school year (2024-25). These data are provided on a state-by-state basis. All figures represent projections by state education agencies—or NEA Research—as of February 2026.

NEA Research submits current-year estimates of educational statistics to each state’s Department of Education for verification or revision each year. The figures are generated primarily using time series analyses, which are standard statistical techniques designed to make predictions for the current year using numerical data from prior years. If an education department does not replace these projections with its own estimated data and NEA Research cannot find an equivalent source of data on the state department of education website, this report uses an estimate generated either from a time-series model that uses past *Rankings & Estimates* data or from one of two sources: the American Community Survey (ACS) for average salaries, or NCES for non-salary data points. Which estimate source is used depends on NEA’s knowledge of an individual state’s trends and policy actions over time, the quality of that state’s existing *Rankings & Estimates* data, and the size of the state, as ACS data are most accurate for states with larger populations.

The last part, *National Trends 2017-26*, highlights summary public school statistics for the United States over the last decade on students, teachers and instructional staff, school revenues, and education expenditures.

NEA Research has calculated salary estimates using American Community Survey data for states that have not reported such data for some years.

Note that throughout this publication school years may be indicated in several equivalent ways. More specifically, the school year from September 2025 through June 2026 may be shown as “2025-26,” or it may be indicated by shorthand as “2026,” or “26.”

Also note that some totals in certain tables may not sum exactly because of rounding. Dollar values are expressed in “current dollars” unless otherwise noted.

The Consumer Price Index for all Urban Consumers is applied for computation of constant dollar salary, revenue, and expenditure data.

Data on COVID relief funds from the United States Department of Education’s Education Stabilization Fund Transparency Portal informed revenue and expenditure estimates for the years of 2021-22 through 2024-25.

## Series F - School Revenues and Expenditures

- F-1. Estimated Revenue and Non-Revenue Receipts in 2024-25 (\$ Thousands)
- F-2. Estimated Revenue and Non-Revenue Receipts in 2025-26 (\$ Thousands)
- F-3. Estimated Changes in Revenue and Non-Revenue Receipts from 2024-25 to 2025-26
- F-4. Estimated Revenue by Source as a Percentage of Total Revenue Receipts
- F-5. Estimated Public School Expenditures in 2024-25 (\$ Thousands)
- F-6. Estimated Public School Expenditures in 2025-26 (\$ Thousands)
- F-7. Estimated Changes in Expenditures from 2024-25 to 2025-26
- F-8. Estimated Public School Current Expenditures Per Student in Fall Enrollment
- F-9. Estimated Public School Current Expenditures Per Student in ADA

**F-1. Estimated Revenue and Non-Revenue Receipts in 2024-25 (\$ Thousands)**

# Glossary

**Average Daily Attendance (ADA)**

The aggregate attendance of a school during a reporting period divided by the number of days school is in session during this period.

**Average Salary**

The arithmetic mean of the salaries of a specified group. This figure is the average annual regularly paid gross salary before deductions for Social Security, retirement, health insurance, and other benefits.

**Capital Outlay**

An expenditure that results in the acquisition of fixed assets or additions to fixed assets, which are presumed to have benefits for more than one year. It is an expenditure for land or existing buildings, improvements of grounds, construction of buildings, additions to buildings, remodeling of buildings, or initial, additional, and replacement equipment.

**Classroom Teacher**

A staff member assigned the professional activities of instructing students in self-contained classes or courses or in classroom situations. The number of classroom teachers is expressed in full-time equivalents.

**Current Expenditures**

The expenditures for operating local public schools, excluding capital outlay and interest on school debt. These expenditures include such items as salaries for school personnel, fixed charges, student transportation, schoolbooks and materials, and energy costs.

**Current Expenditures for Other Programs**

Current expenses for summer schools, adult education, post-high-school vocational education, personnel retraining, and community services; services to private school students, community centers, recreational activities, and public libraries, and so on, when operated by local school districts and not part of regular public elementary and secondary day-school programs.

**Fall Enrollment**

The number of students registered in the fall of the school year, usually in October.

**Full-Time Equivalent**

Full-time equivalent is derived by dividing the amount of time employed by the time required in a corresponding full-time position.

**Instructional Staff**

Full-time equivalent public elementary and secondary school staff members that are involved in teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, classroom teachers, guidance counselors, librarians and media specialists, remedial specialists, and other instructional staff. Excludes paraeducators/instructional aides, administrative staff, attendance personnel, clerical personnel, health services personnel, psychologists, social workers, or persons whose jobs do not require skills in the field of education.

**Interest on School Debt**

Annual expenditures to pay interest only on long-term debt.

**K-12**

Kindergarten through 12th grade and may include preschool if it is an integral part of an elementary school or a regularly established school system.

**Non-revenue Receipts**

The amount received by local education agencies from the sale of bonds and real property and equipment, loans, and proceeds from insurance adjustments.

**Operating School District**

A school district that directly provides instruction for students by hiring its own staff.

**Public Education**

The provision or support of public schools and schools operating by public charter.

**Revenue Receipts**

Revenue receipts for public school purposes derive from three main sources:

- *Local.* Local, intermediate, and other sources include all funds for direct expenditures by local and intermediate districts for school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or Social Security on behalf of public school employees, for the purchase of materials for distribution of local school districts, and so on.
- *State.* Revenue receipts from state sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or Social Security on behalf of school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes.
- *Federal.* Revenue receipts from federal sources include money distributed from the federal treasury either directly to local school districts or through the state and county.

**School District**

An education agency at the local level that exists primarily to operate public schools or to contract for public school services. Synonyms are “local basic administrative unit” and “local education agency.”

**Student-Teacher Ratio**

The number of students in fall enrollment divided by the number of classroom teachers.

**Total Expenditures**

Includes all current expenditures, capital outlay, and interest on the school debt.

**Total Revenue Receipts**

Includes all revenue receipts available for expenditure for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; and so on. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.

# State Notes for Rankings and Estimates

The NEA recognizes that each state's department of education (DOE) has its own system of accounting and reporting for state executive and legislative branch purposes. As a result, it is not always possible to obtain completely comparable data for every state. For this reason, NEA Research encourages each state DOE to include any clarifying information that is necessary for a proper interpretation of the data supplied. In response, state education departments have provided clarifying and explanatory information. NEA Research has calculated salary estimates using American Community Survey data for the states that have not reported such data for some years.

**ALASKA:** Alaska does not compute ADA, only Average Daily Membership (ADM). Hence, reported figures are NEA estimates.

**ARIZONA:** Teacher data includes both district and charter school teachers. The teacher salary average is based on the School District Employee Report (SDER) and does not include charter school teacher salaries.

**CALIFORNIA:** Fall enrollment data include Transitional Kindergarten students but do not include students in other federal or state-funded preschool programs such as Head Start or the California State Preschool Program. Average teacher salary data are based on the annual report released by the California Department of Education, "Selected Certificated Salaries and Related Statistics".

**CONNECTICUT:** Salary estimates have been calculated from American Community Survey data for school years since 2016-17.

**DISTRICT OF COLUMBIA:** Salary estimates have been calculated from American Community Survey data for school years since 2013-14.

**ILLINOIS:** Salary estimates have been calculated from American Community Survey data for school years since 2014-15.

**MISSOURI:** School district count includes charter schools in Kansas City and St. Louis. Instructional staff may include duplicated numbers as a teacher can teach in both elementary and secondary levels. Average teacher salary figures do not include payments from the Teacher Baseline Salary Grant. The salary averages with Teacher Baseline Salary Grant payments included are 57,661 for 2025 and 59,795 for 2026.

**MONTANA:** Salary estimates have been calculated from American Community Survey data for school years since 2010-11.

**NEVADA:** Nevada collects and reports average daily attendance rates, not the numbers. Hence, reported figures are NEA estimates.

**NEW JERSEY:** Salary estimates have been calculated from American Community Survey data for school years since 2011-12.

**NEW YORK:** New York City districts are reported as one district. The New York Department of Education does not report ADA; hence, NEA estimates are used.

**NORTH CAROLINA:** District, enrollment, and teacher data do not include public charter schools. Salary averages are based on data published in the annual Highlights of the North Carolina Public School Budget report released by the North Carolina Department of Public Instruction. Salary averages include local supplementary pay in addition to the base salary, but exclude bonuses and extra pay.

**RHODE ISLAND:** Salary estimates have been calculated from American Community Survey data for school years since 2010-11.

**SOUTH DAKOTA:** The contracted staff at Abbot House, Ombudsman, and Mitchell High School technical education classes were included in these figures.

**TEXAS:** Expenditure figures were estimated by the Texas Education Agency and may include federal COVID relief revenues that have been allocated but not yet spent.
